About me

I am actively looking for a junior Python developer position where I can apply and grow my skills. My main area of expertise is back-end development with Python and Django , but I also have knowledge and experience with front-end development (HTML5, CSS3 and JavaScript) . I lerned it in courses and independently, also I worked on my own projects.

Sociable and open, good team player, not afraid to experiment, fast lerner, logically oriented mind. I have a great desire to build a career in IT and a desire to develop. My goal is to gain real work experience in the company and in the team. I read technical literature, study English and looking for ways to grow myskills.
